In order to receive the exclusion, this claim for	•	sessor prior to or	within 30 days of comp	letion of the project
All documents necessary to support the exclus completion of the project.				
The property owner, primary contractor, civil o	r structural engineer, or a	chitect shall certif	y to the building depart	ment those portions
of the project that are seismic retrofitting comp				
of the project, the building department shall re	eport to the Assessor the c	costs of the portion	ns of the project that are	e seismic retrofitting
components.				
For purposes of section 74.5				
 "Seismic retrofitting components" means se technologies. 	eismic retrofitting improven	nents and improve	ments utilizing earthqua	ke hazard mitigation
(2) "Seismic retrofitting improvements" means retrofitting or reconstruction of an existing building or structure, to abate falling hazards				
from structural or nonstructural components of any building or structure including, but not limited to, parapets, appendages, cornices,				
hanging objects, and building cladding that pose serious danger. "Seismic retrofitting improvements" also means either structural				
strengthening or providing the means necessary to resist seismic force levels that would otherwise be experienced by an existing				
building or structure during an earthquake, so as to significantly reduce hazards to life and safety while also providing for the substantially safe ingress and egress of building occupants during and immediately after an earthquake. "Seismic retrofitting improvements" does				
not include alterations, such as new plumbing, electrical, or other added finishing materials, made in addition to seismic-related work				
performed on an existing structure. "Seismic retrofitting" includes, but is not limited to, those items referenced in Appendix Chapters				
5 and 6 of the Uniform Code for Building Conservation of the International Conference of Building Officials.				
(3) "Improvements utilizing earthquake hazard mitigation technologies" means improvements to existing buildings identified by a local government as being hazardous to life in the event of an earthquake. These improvements shall involve strategies for earthquake				
protection of structures. These improveme
